Liberty®

2023 Spring Flushing Program

Flushing is an Essential Part of Our Annual System Maintenance Program

Each spring, Liberty flushes the pipes in our water distribution system. This is an essential part of our system maintenance program, which helps us to continue to provide you with high-quality water service. Although we've been carrying out this essential maintenance program for decades, we do receive questions from time to time about why we flush.

How We Flush Our Pipelines

Flushing involves simultaneously opening fire hydrants in a specific area to create increased water flows. When crews are in your area, you may notice a drop in water pressure or discolored water. Discolored water may occur because the sediment in water mains get stirred up when the fire hydrants are used and when the flow of water in mains is changed. This is normal.
If this happens, it is not harmful. Simply let your water run until it is clear.

Why Flushing is Important

Flushing our system helps to clean out any build up of mineral deposits and sediment inside the pipes. These harmless deposits can occur when there is a reduced water demand. We also flush our hydrants to make sure they are operational and to check fire flows in our system.

How to Prepare

- Check for discolored water before using the washing machine or dishwasher.

Note: If your laundry becomes stained, **DO NOT USE BLEACH AND DO NOT PUT YOUR LAUNDRY IN THE DRYER.** Rewash clothes immediately using more detergent or a heavy duty detergent and add a rust remover. Most rust removers can also be used on stained fixtures.

See the next page for this year's flushing schedule.

2023 Spring Flushing Schedule

Town	Start Date	End Date
Arbor Hills	4/26/2023	4/26/2023
Atlantic Beach	4/17/2023	4/21/2023
Baldwin	3/27/2023	3/31/2023
Bay Park	5/15/2023	5/19/2023
Beaver Dam Lake	4/27/2023	4/27/2023
Bellmore	5/1/2023	5/5/2023
Cambridge	4/24/2023	4/24/2023
Cedarhurst	5/1/2023	5/5/2023
Dykeer	4/27/2023	4/27/2023
