

## Spruce Up Your Sprinkler

Spring has sprung and that means it's time to spruce up your sprinklers. Taking just a few steps in preparing your irrigation system can help you save water and lower your bill. It's easy - just remember to inspect, connect, direct, select and schedule!

**Inspect:** Just turning on your irrigation system? Check for broken or damaged sprinkler heads to avoid wasting water.

**Connect:** Fix any breaks or leaks in your landscaping or reach out to an irrigation professional for help. A pool of water could be a sign of a leak/broken connection.

**Direct:** Watering the sidewalk is wasteful! Ensure your sprinklers are pointed towards your lawn.

**Select:** A WaterSense labeled, weather-based irrigation controller automatically adjusts watering schedules based on local weather and landscape conditions. Scan the QR code below to see if you're eligible for a Rachio smart controller discount.

**Schedule:** Check that your irrigation controller is programmed correctly. Scan the QR code below to view guidelines Liberty has developed to water smartly!

## Spring Flushing is Here

Each spring, Liberty flushes the pipes in our water distribution system. This is an essential part of our system maintenance program, which helps clean out any build up of mineral deposits and sediment inside the pipes. These harmless deposits can occur when there is a reduced water demand. We also flush our hydrants to ensure they are operational.

When crews are in the area, customers may experience a drop in water pressure or discolored water. Discolored water can be cleared up by simply letting your water run until it is clear.

For more information about flushing and a schedule for when we may be in your area, please visit our website.

## Quality to Trust – Results to Prove It

Liberty is committed to providing safe, high-quality water and reliable service to our customers and communities. We have an exceptional track record when it comes to water quality and drinking water regulatory compliance. That is why we invite you to read our latest Water Quality Report for your community. You can find it at [www.libertyenergyandwater.com](http://www.libertyenergyandwater.com) or by scanning the QR code.
